

(N) What happened at the chess tournament? (1/1)

Hungarian is a Finno-Ugric language spoken in Hungary by about 10 million speakers and about 2.5 million speakers in the surrounding countries, as well as the diaspora. Hungarian is often called a nonconfigurational language, which means that a) the words are unambiguously marked for their role in the sentence and b) the word order is not rigid but often determined by the conversational context the sentences appear in.

Match the Hungarian sentences with their English translations.
